

Market and technology overview of hydrogen internal combustion engine concepts

CLIENT: FUELS & LUBRICANTS MANUFACTURER

BACKGROUND: Customer wishes to understand details of H₂-ICE concepts and its market chances; FEV provided technology & market overview

DELIVERABLES

- Summary report covering key market and technical aspects of hydrogen internal combustion engine powertrain
 - Market drivers
 - Suitability for different vehicle applications
 - Previous developments
 - Current and future developments
 - Outline technical specifications
 - Fuel and lubricant requirements
- Key required enablers for market uptake
- Outlook for future market success
