### FEV Consulting – Best of Two Worlds

FEV Consulting provides unique, client-oriented advisory services through the combination of years of experience in top management consulting and the technical expertise of the FEV Group. Our deep knowledge, of the automotive and aviation industries in particular, enables us to find innovative solutions for the complex challenges faced by our clients.

### Become part of our team!

We are looking for a Master student (m/f/d) for the topic:

### Electrification of the non-road sector - what strategic decisions need to be made today?

Even if the electrification of the non-road sector is delayed compared to the automotive sector, strategic decisions, especially for the development and production of battery systems and electric motors, must be made today.

In the context of a current customer project, it will be your task to answer crucial questions on strategic development. What are current technology trends in the field of battery systems and electric motors? How do the requirements differ between non-road and automotive applications? Which parts are purchased, which are manufactured inhouse? What competencies and investments are required for the development and production?

### Your task and profile

- Qualitative and quantitative assessment of results
- Self-dependent and diligent style of working
- Study of Industrial, Mechanical or Chemical Engineering or a related field of study

### We offer

Design the mobility of tomorrow together with our customers. We offer you an exciting working environment, direct customer contact, an extensive network of expertise, intensive support and personal further development supported by your personal mentor.
