## FEV Consulting – Best of Two Worlds

FEV Consulting provides unique, client-oriented advisory services through the combination of years of experience in top management consulting and the technical expertise of the FEV Group. Our deep knowledge, of the automotive and aviation industries in particular, enables us to find innovative solutions for the complex challenges faced by our clients.

### Become part of our team!

We are looking for a Master student (m/f/d) for the topic:

### **Will there be enough hydrogen for decarbonization for the transportation sector, and if so, at what price?**

Hydrogen is showing increasing signs of becoming a central element in the transformation of the transportation sector. The successful adoption of hydrogen in the transport sector depends to a large extent on the market price. In the medium term, this price is determined by supply and demand.

Within the scope of this master thesis, a model is to be created that describes the future supply and demand situation of hydrogen. The results are to be interpreted and validated and based on this, an economic analysis for the use of hydrogen in the transport sector is to be carried out.

### Your profile

- Degree in industrial engineering or a similar course of study
- Outstanding analytical and communication skills
- High level of commitment and dedication
- Distinct creativity and team spirit

### We offer

Design the mobility of tomorrow together with our customers. We offer you an exciting working environment, direct customer contact, an extensive network of expertise, intensive support and personal further development supported by your personal mentor.
