FEV Consulting – Best of Two Worlds

FEV Consulting provides unique, client-oriented advisory services through the combination of years of experience in top management consulting and the technical expertise of the FEV Group. Our deep knowledge, of the automotive and aviation industries in particular, enables us to find innovative solutions for the complex challenges faced by our clients.

Become part of our team!

We are looking for a Master student (m/f/d) for the topic:

Buildup of a tool for CO₂ life cycle analysis (LCA) for mobile applications and different powertrains

Currently the EU-Commission is discussing the target of a 55% reduction of the CO₂ emission compared to 1990. In order to reach this target mobility solution, need to be considered along the entire lifetime. Beside the operation of the vehicle CO₂ emissions also arise in the material production, the vehicle production and the disposal. Within this thesis a life cycle analysis model will be buildup which enables the entire ecological analysis of different powertrain and vehicle technologies. The tools should be used for sensitivity analysis and to derive final recommendations.

Your profile

- Very good academic performance
- Study in business administration & engineering, mechanical engineering or a comparable course of studies
- High understanding of technical interrelationships
- Outstanding analytical and communication skills
- High commitment, creativity and team spirit
- Ideally first experiences from the industry or management consultation

We offer

Design the mobility of tomorrow together with our customers. We offer you an exciting working environment, direct customer contact, an extensive network of expertise, intensive support and personal further development supported by your personal mentor.
