**Aachen, November 2022 – FEV's employees occupy the top spot among German companies in the automotive industry thanks to the level of their qualifications. This was the conclusion of a study conducted by the personnel consultancy CASE (candidate select GmbH). It evaluated 1.5 million profiles of employees from more than 650 companies based in Germany. A total of ten industries were in focus, with 50 companies examined in the automotive sector.**

“We always look for the best qualified candidates and continuously develop the individual skills of our colleagues. The fact that FEV's experts are rated as the No. 1 in the automotive industry is a great success that reflects our philosophy and also our aspiration: we want to work with the brightest minds, we are curious, unconventional and combine the most diverse disciplines and cultures,” said Prof. Stefan Pischinger, CEO of FEV Group. “The goal is always to develop ideas and solutions that set standards worldwide and give our customers and partners the decisive edge.”

The personnel consulting company CASE, which is a spin-off of the University of Bonn (Germany), has developed a score to measure differences in performance with regard to the academic

qualifications of employees. With its help, university graduates from different contexts can be compared more meaningfully and thus more fairly, without being too one-sidedly focused on titles or grades. In the current Employer Ranking 2022 – divided into ten industrial sectors – CASE evaluated the qualifications of employees from a total of 659 companies based in Germany. The evaluation was carried out by an algorithm based on publicly available web profiles.

#### About FEV

##### **FEV has always pushed the limits.**

FEV is an internationally recognized leader of innovation across different sectors and industries. Professor Franz Pischinger laid the foundations by combining his background in academia and engineering with a great vision for continual progress. The company has supplied solutions and strategy consulting to the world's largest automotive OEMs and has supported customers through the entire transportation and mobility ecosystem.

**As the world continues to evolve, so does FEV.**

That's why FEV is unleashing its technological and strategic expertise into other areas. It applies its forward thinking to the energy sector. And its software and system know-how will enable the company to lead the way making intelligent solutions available to everyone. FEV brings together the brightest minds from different backgrounds and specialties to find new solutions for both current and future challenges.

**But FEV won't stop there.**

Looking ahead, FEV continues to push the limits of innovation. With its highly qualified 7,000 employees at more than 40 locations globally, FEV imagines solutions that don't just meet today's needs but tomorrow's. Ultimately, FEV keeps evolving – to a better, cleaner future built on sustainable mobility, energy and software that drives everything. For the companies' partners, its people and the world.
